

SC-1

PACKED AND READY TO ROLL

One of the biggest public-health crises we face today is the rapid spread of antibiotic-resistant bacteria, the best-known being *Methicillin-resistant Staphylococcus aureus* (MRSA). How to fight it? **Stop it from spreading.** The best line of defense against MRSA is to disinfect regularly. Hospitals, doctor's offices, gymnasiums, schools, subways, and other public places ALL need to participate. It's smart risk management to find the very best way to disinfect surfaces people come in contact with and prevent the spread of MRSA.

That's where Electrostatic Spraying Systems' SC-1 Sprayer comes in.

This robust little sprayer may be small, but it's no lightweight. All the accessories pack onboard. Then you pull up the retractable handle and go. How well does it work? Well, like all our electrostatic sprayers, the SC-1 does a great job applying disinfectants to uneven surfaces. Take a look at these two ceramic test targets:

Each was sprayed separately and each spray was the same except for one thing – the left target was sprayed with the electrostatic charging system ON, but the right target was sprayed with the charging system OFF. The results are *astounding*.

Our ESS SC-1 electrostatic sprayer has the ability to coat surfaces with a fine mist of a disinfecting chemical – it doesn't bead up and run off, it dries quickly, but most of all, it goes where other sprays don't go. It wraps around and covers the underneath and the back side of exposed surfaces. That's right! **Regular sprayers just can't do that.**

Technical Specifications

Nozzles	1	Electrical cord	10 ft. (3 m.)
External air supply required	No	Weight (full)	40 lbs. (18.1 kg.)
Electricity required	110v	Flow Rate	1 gal./hr. (3.8 ltr./hr.)
Tank	1 gal. (3.8 ltr.)	Drop Size	40 micron VMD
Size	22"H x 12"W x 15"D (56 cm. x 30 cm. x 38 cm.)	Spray Range	Up to 8 ft. (2.4 m.)
Hose	6 ft. (2 m.)	Options	15 ft. (4.6 m.) hose

Above: The deadly methicillin-resistant *Staphylococcus aureus* bacteria. Below: The natural enemy of MRSA – The incredibly compact SC-1 Electrostatic Sprayer. This self-contained sprayer is perfect for disinfection, sanitization, and odor control applications. The SC-1 is ready to go wherever and whenever you need it.
